RDTF Disciplines and Skill Groups*

"Making molecules"

Chemical Sciences & Engineering

- Chemistry (CH)
- Kinetics & Catalysis (KC)
- Reaction Engineering (RE)
- Integrated Process Development (PD)
- Molecular Analysis (MA)

GDH: Sander van Bavel
Principal Science Fellow

"Subsurface"

Subsurface Sciences & Engineering

- Earth Sciences (EA)
- Reservoir Science & Engineering (RS)

GDH: Matthias Appel
Chief Scientist Geological Science & Engineering

"Bioscience"

Biological Sciences & Engineering

- Ecological Science & Engineering (EC)
- Bioprocess & Biochemical Science & Engineering (BB)

GDH: Damian Allen
Principal Science Fellow

Electrical Sciences & Engineering

- Energy Storage & Conversion (ES)
- Power Technology & Systems Integration (PS)

GDH: Elizabeth Endler
Chief Scientist Power & Systems Integration

"Power & Devices"

Material Sciences & Engineering

- Materials Characterization & Testing (MC)
- Catalytic Materials Synthesis (CM)
- Science of Engineering Materials (EM)
- Mechanical Engineering & Formulation Science (MF)

GDH: Rolf van Benthem
Chief Scientist Materials Science & Engineering

"Structure & Properties"

Computer Sciences & Engineering

- Data Science (DS)
- Artificial Intelligence (AI)
- Computational Science (CS)
- Mathematics & Statistics (MS)

GDH: Detlef Hohl
Chief Scientist Computation & Data Science

"Digital Enablers"

* Details of individual Skill Groups can be found here : R&D Technical Function 19 Skill Groups in 6 Disciplines.pdf

The R&D Technical Function Leadership Team

Technical Function Head

Selda Gunsel

Chief Engineer

Ajay Mehta

Global Discipline Head
Material Sciences & Engineering

Rolf van Benthem

Global Discipline Head
Subsurface Sciences & Engineering

Matthias Appel

Global Discipline Head
Biological Sciences & Engineering

Allen, Damian J

Global Discipline Head
Electrical Sciences & Engineering

Elizabeth Endler

Global Discipline Head
Chemical Sciences & Engineering

Sander van Bavel

Global Discipline Head
Computer Sciences & Engineering

Detlef Holf

HR Advisor
HR consultant

Christine Wijbenga

Learning Solutions Advisor
Manager Learning Technology

Tanja M Winter

Project Manager

Associated General Managers

Chemical S&E

Dawid J D'Melo HP Calis

Subsurface S&E

Marcella Dean-Elsener Miranda Mooijer

Biological S&E

Catherine Price

Electrical S&E

Ilse van der Net Ingmar Ploemen Theo Bodewes

Materials S&E

Ed Schouten Matthias Mundt Sukanta Ghosh

Computer S&E

Tekin Mentes Karina Fernandez Francesco Menapace Seema Gopal

Skill Group Leads

Chemical S&E

Chemistry
Cracknell, Roger

Kinetics & Catalysis
Bezemer, Leendert

Reaction Engineering
Unruh, Dominik

Molecular Analysis
Panjala, Devadas

Integrated Process Development
Urade, Vikrant

Materials S&E

Materials Characterization
Berg, Steffen

Catalytic Materials Synthesis
Reynolds, Michael

Science of Engineering Materials
Nijmeijer, Arian

Mechanical Engineering & Formulation Science
Song, Wei

Subsurface S&E

Earth Sciences
Bourne, Stephen

Reservoir Science & Engineering
Snippe, Jeroen

Biological S&E

Ecological Science & Engineering
Davies, Christian

Bioprocess & Biochemical Science & Engineering
Sadasivan Vijayakumari, Sivakumar

Electrical S&E

Energy Storage & Conversion
Geuzebroek, Frank

Power Technology & Systems Integration
Wilbrand, Karsten

Computer S&E

Lu, Ligang

Artificial Intelligence
Devarakota, Pandu

Computational Science
Alpak, Omer

Mathematics & Statistics
Plessix, Rene-Edouard

RDTF Representatives

RDTF Local/Site Representatives

STCH
Mateeva, Albena

ETCA
Higler, Arnoud

STCB
Shetty, Sharankumar

STCHa
Null, Volker K

Co-Rep PXE

STCH
Ackerman, Annette

ETCA

STCB
Ganji, Santosh

STCHa
Petersen, Matthias

Discipline Representatives (SGP / SATP) - Computer S&E

RDL
Rani, Pooja

AP
Shetty, Sharankumar

AP
Dhas, Gaxton

AP
Rizvi Khaleeli, Asmi

EU
Alvarenga, Estevao

EU
Johansen, Marita

EU
Prorok, Dominik

Discipline Representatives (SGP / SATP)

Chemical S&E
Wadman, Sipke

Subsurface S&E
Araujo, Mariela

Biological S&E
Tsesmetzis, Nicolas

Electrical S&E
Higler, Arnoud

Materials S&E
Zuidema, Erik

The RDTF Representatives

- Global Discipline Representatives
- Local RDTF Representatives (PSE/PXE duo)

8 RDL's: Pooja Rani (AM), Sharan Shetty, Gaxton Dhas, Asmi Risvi Khaleeli, Prakalp Somawanshi (AP), Estevao Alvarenga, Marita Johansen & Domonik Prorok (EU)

DR Arnoud Higler

Electrical Sciences & Engineering

Computer Sciences & Engineering

Material Sciences & Engineering

DR Erik Zuidema

Biological Sciences & Engineering

DR Nicolas Tsesmetzis

Subsurface Sciences & Engineering

DR Mariela Araujo

DR Sipke Wadman

Chemical Sciences & Engineering

The perspective of Experimentalists

- Essential contributors in all skill groups for "deep technical capabilities", integrated with scientists and engineers
- Work in progress: '**Community of Practice**' across all disciplines
  - Linking pins: local RDTF Representatives

Experimentation Community Network (ECN @ STCB)

(monthly connect of the testing departments @ STCHa)

Experimentalist Community STCH

Science Professional Group

Experimentalist Community ETCA

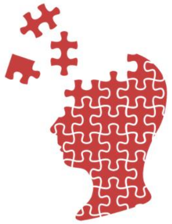
Concrete benefits of the new RDTF

1 Building our ('deep technical') Capability

2 Sharing our Knowledge

3 Navigating your Skills and Career

1. Building our (‘deep technical’) Capability



- Contribute to the Skill Group Development Plan
  - Your perspectives count: **be heard**! Bottom-up self-assessment: **become the best version of ourselves**
  - How can we improve, become **future-ready**? Advise to CTO / CIO
  - **Your SGL organizes** input sessions and drafting / commenting

CONFIDENTIAL

Skill Pool Development Plan:

Example (name)

2025

Authors:	
Contributors:	
Business / Strat rep’s consulted:	

CONFIDENTIAL

1. Skill Pool Description

Summary	Capability to… (describe what the Skill Pool is about in max 200 words)	
Discipline	Materials Sciences & Engineering (example)	
Principal Science Experts / Fellows	• List of names of associated PSE’s, PSF	Skill Pool Lead:
Principal Experimentalists	• List of names of associated PXE’s	
Technical Authorities	• Optional (if applicable): names (TA1, TA2)	
Assigned members	• Total number (prim/sec skill pool) of members • Spread over main GM-ships (in PTX, IDT, or other parts of the Shell as relevant - non exhaustive)	

Expertise and specific “deep technical capability” Skills

- List expertises and skills distinguishing this Skill Pool (with short descriptions if needed)
- Keep to one page in total

CONFIDENTIAL

2. Skill Pool Use and Support

Use in R&D projects	Business relevance
• List of (main) running R&D projects (H1-2-3) in PTX or other parts of Shell, in which the Skill Pool’s capability is applied (briefly describe)	• Shortlist (main) business VP/GM-ships, with a brief description of the relevance of the Skill Pool’s capabilities for that business, and how they are supported by the Skill Pool

External network and connections

- List and describe (main) external collaborations in which the Skill Pool is used or further developed, memberships, strategic partnerships, professional community interests, etc

Critical Support: - to other Skill Pools	- from other Skill Pools
• List of supported other Skill Pools (specified how)	• List of supporting Skill Pools (specified how)

Critical Assets: - facilities	- equipment
• List of labs, pilot lines, access to facilities	• List of critical machines, devices, instruments (keep to one page)

CONFIDENTIAL

3. Skill Pool Health Assessment 2025

Qualitative “Capability”: SWOT analysis

Strengths	Weaknesses
• S1 Leading knowledge position (mechanistic understanding in XYZ Technology) in • S2 New high-end facilities operational in …, supported by digital tool ABC • S3 IP filed on … (Control Point in TMP …) • S4 Reports filed on new insights in	• W1 Lack of access to • W2 Need to catch up on XOM in understanding of • W3 Critical mass missing in • W4 High workloads in PTX-Z at STCX
Opportunities	**Threats**
• O1 Improved control of • O2 Apply XYZ technology also for Business A; (synergistic innovation opportunity in	• T1 Stalling or unclear legislative drivers for • T2 At risk of losing on critical mass in

Quantitative “Capacity”: workforce …	… vs workload
• List (main) expert groups (contributors from this Skill Pool), and indicate available workforce sizes (#FTE) per GM ship or Team …	• … with indication of demand for capabilities from this Skill Pool (#FTE, higher / lower, indication of above / at / below critical mass) (keep to one page)

CONFIDENTIAL

4. Skill Pool Development

2030 Aspirations for Expertises and Skills (Business & Strategy Back)

Emerging:	Sustaining:
• List expertises / skills that need to be actively initiated & built up in 2025 → 2030	• List expertises / skills that require sustained development 2025 → 2030
Growing:	**Fading / phasing out:**
• List expertises / skills that need to grow by accelerated development 2025 → 2030	• List expertises / skills expected to wind down, fade or phase out in 2025 → 2030

Skill Pool Gaps (2025 → 2030 business & strategic aspirations)

- List of forward looking Gaps identified with clear description, and reference to SWOT where appropriate
- Indicate qualitative and quantitative aspects where possible
- Keep to 5 main gaps, itemize if grouped (see hypothetical examples below)

- GAP 1: **Carbon electrolysis.** Although our knowledge position in water electrolysis is strong (S1), the Hydrogen and H3 TMP’s expect higher demand (net + 2 FTE) for specific CO2 co-electrolysis expertise. For flexible operations in PTX-Z, an adaptable catalyst configuration is needed in a new electrolysis pilot line, so that study of catalytic efficiency can be greatly enhanced (O2) in support of the ABC project.
- GAP 2: **Strengthen the collaboration** between PTX-Z and PTX-Y to capture the synergy (O1) between electrocatalysis and materials characterization (microscopy and X-ray diffraction)
- GAP 3: **Better understanding is needed of by-product formation in the X2Z process**, with specific attention to Ostwald ripening of the micro-particle catalyst-support (W3)
- GAP 4: **Repair of critical mass in solid state physics (PTX-P).** To avoid sub-critical capability in Solid State Physics (T1), the unexpected leave of one PXE and one PSE (W2) needs compensation and renewal of the succession planning.

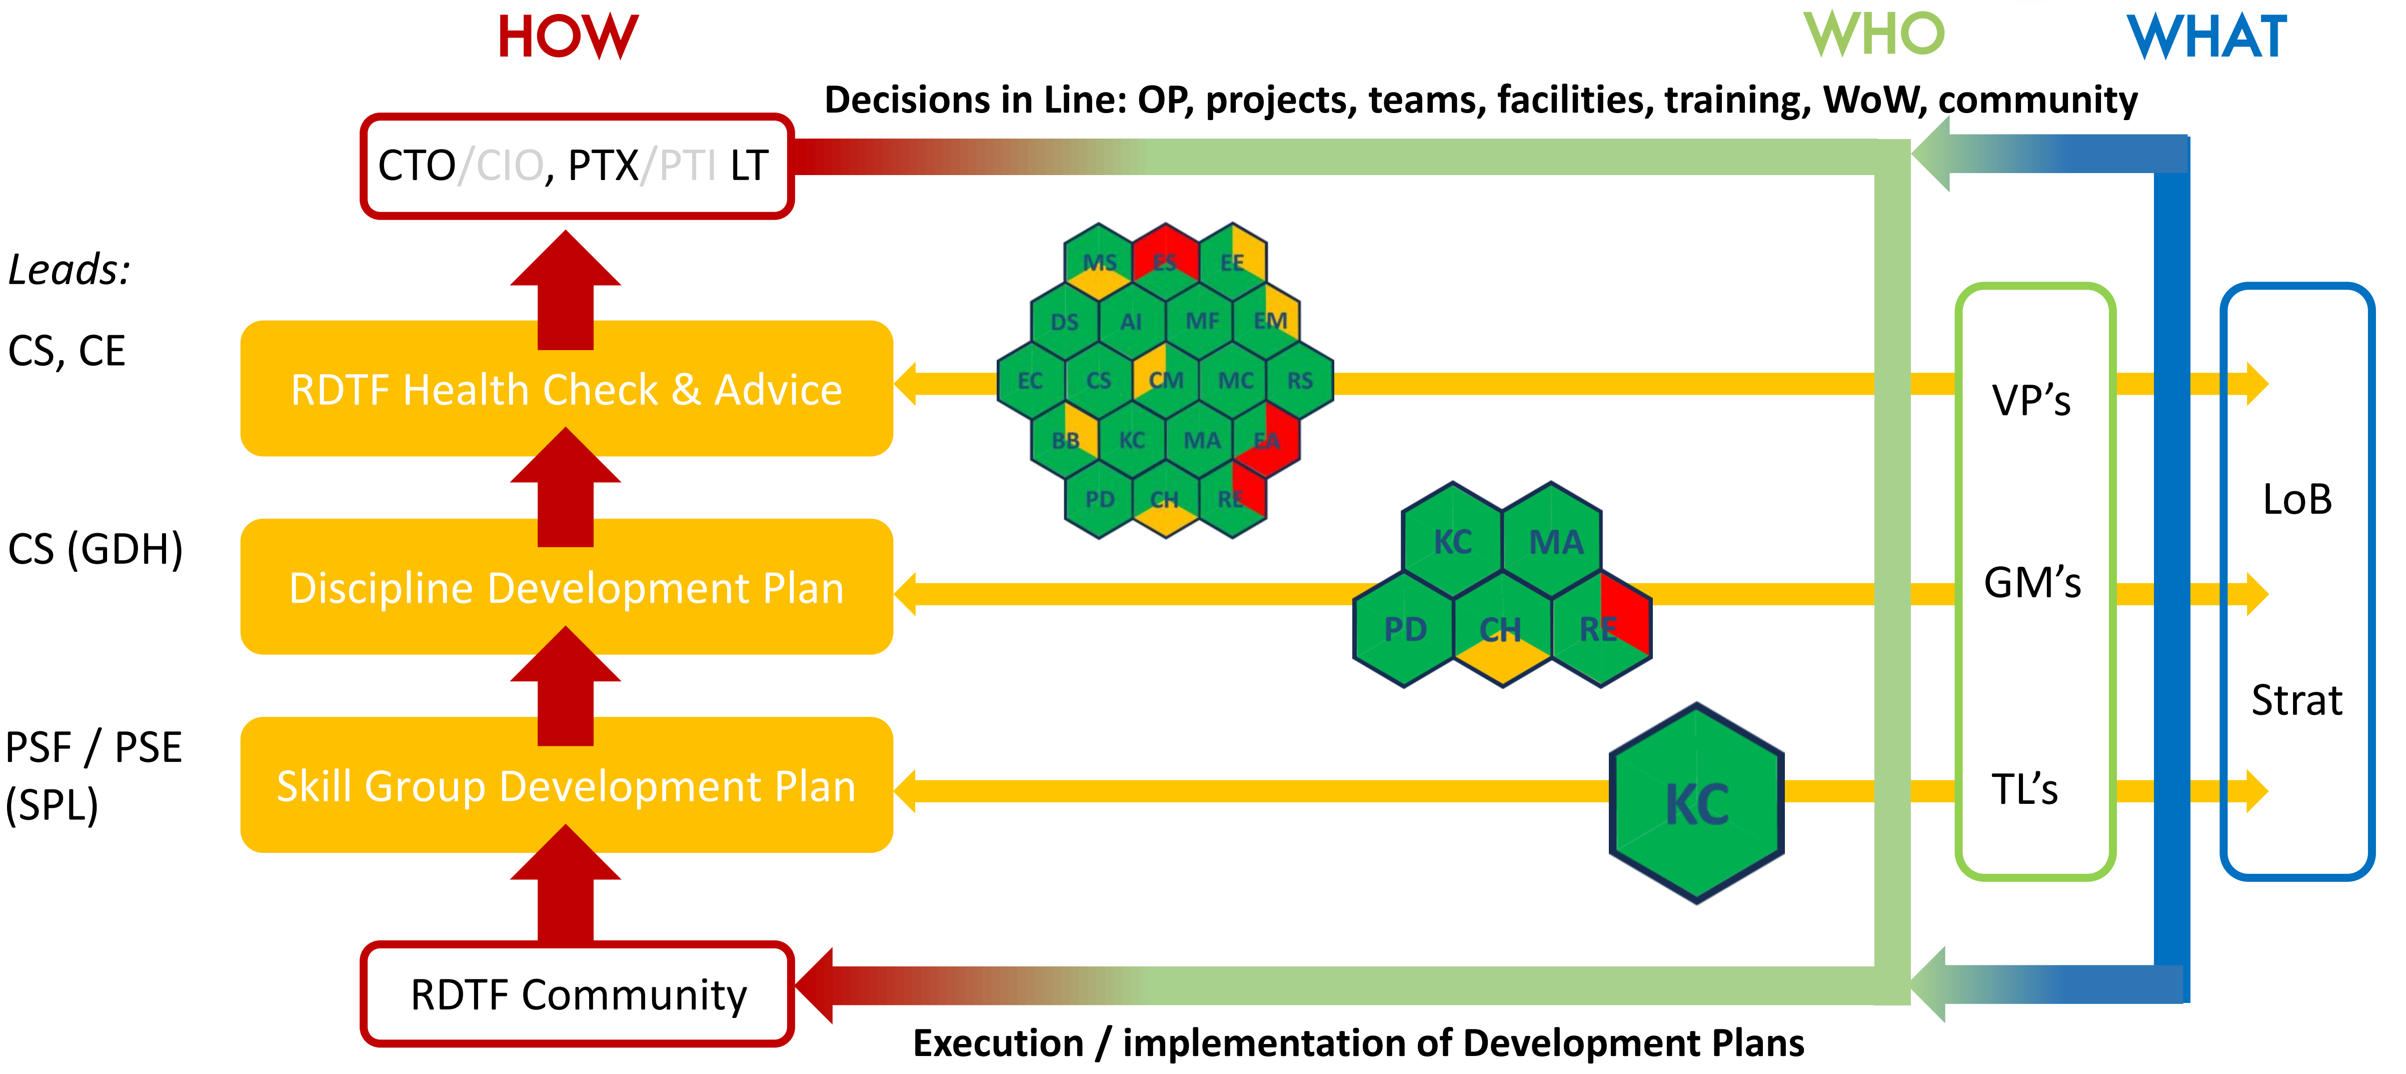
Gap Closing Actions - Skill Pool Building Proposal to Global Discipline Heads

- List of proposed actions (*and indicate proposed action holder in italics*) per GAP, see example below (and above)

- @GAP 1 / 2: recruit 2 electrocatalysis experts in PTX-Z and 1 additional microscopist in PTX-Y. Map, select and endorse external technical upskilling opportunities for electrocatalyst experts. Update succession planning in PTX-Z-A and PTX-Z-B. Set up cross-GM meeting structure. (*GM’s PTX-Z-A and PTX-Y-B*)
- @GAP 1: invest (2.2 M$) in new electrolysis pilot line with UNIOX adaptable catalyst configuration in building A of STCX (*VP PTX-Z*)
- @GAP 3: set up project activity in PTX-Z for developing fundamental understanding and experimental control of Ostwald ripening of silica particles (estimated 3,5 FTE, with support from at least 2 PXE’s) *(GM PTX-Z-C with help from CS and PSE)*
- @GAP 4: one new experienced hire and one new recruit (experimentalist) in solid state physics plus renewal of the physics lab in PTX-P, to restore critical mass. Update succession plan for remaining s-PSE and stimulate new PSE applications (*GM PTX-P*)

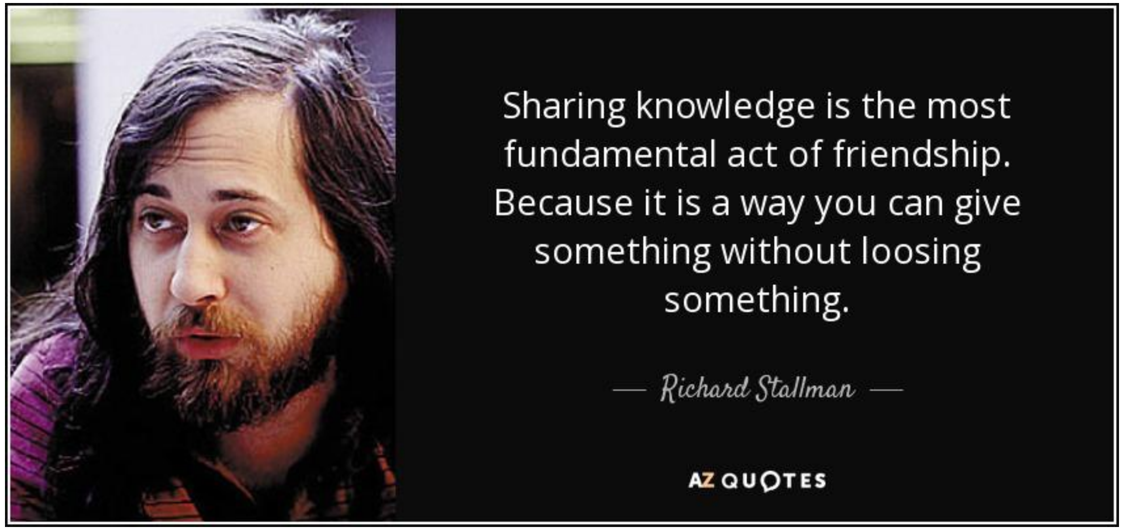
(keep to one or two pages max)

RDTF Health Check: a yearly cadence



2. Sharing our Knowledge

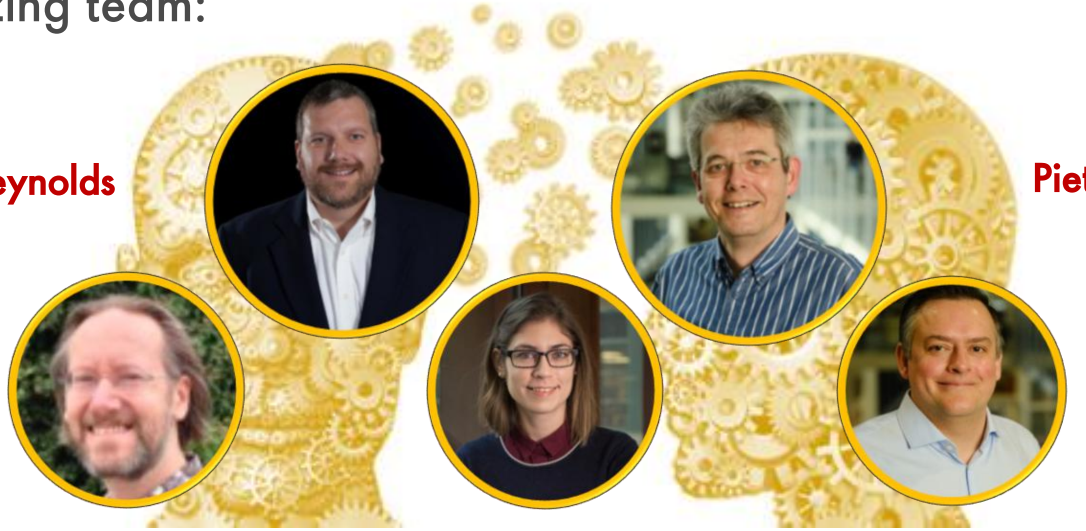
- Disciplines and Skill Groups are encouraged to organize **frequent & multiple** knowledge-sharing events, e.g:
  - In-person (hubs), hybrid or on-line
    - Poster sessions
    - ‘Lunch & Learn’ presentations
    - Lab visits & demo’s
    - Seminars – large or small
  - Specific and targeted topics but open to ‘adjacent’ Disciplines and Skill Groups
    - Focus on themes or knowledge domain incentivizes a targeted audience
    - Branded (“brought to you by …”) and inclusive
    - Driver: **helping each other out – spend a day, save a week**
- RDTF-level: global ‘Technology Webinar’



This mini-seminar is proudly brought to you by Kinetics & Catalysis

2. Sharing our Knowledge

- RDTF-level: 'Technology Webinar'– every Wednesday at a fixed hour
  - 18:30 – 19:30 IN, 15.00 - 16.00 NL, 8:00 – 9:00 US
- "The primary RDTF communication channel globally"
  - Topics span different development stages (D0-D4), different business adjacencies (Horizon 1-3) and all Skill Groups
  - External speakers are regularly invited for a different perspective and an overview of the latest developments.
  - Sessions are also open to attendees outside RDTF with passion for technology development
- Organizing team:



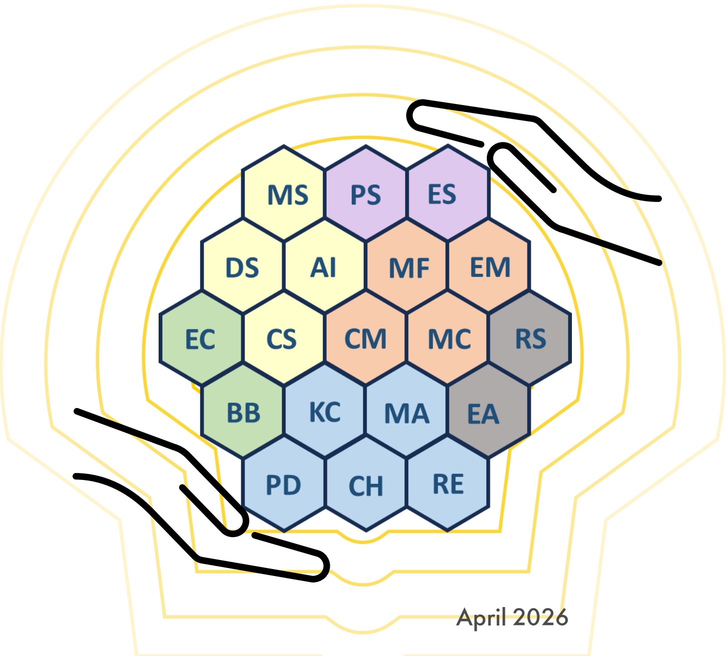
Mike Reynolds

Piet Huizenga

Sander van Bavel

Tracy Lohr

Paul-Emmanuel Just



Sign up? Reach out to us or mail to: Susanne.Nielen@shell.com

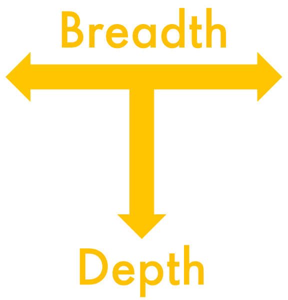
3. Navigating your Skills and Career

- With the new RDTF structure comes the Unified RDTF Competence Framework
  - Instead of separate Competence Frameworks for each Discipline – one for all in R&D
    - Navigate and grow your unique Skill set throughout the 19 RDTF Skill Groups – all for one
  - Common and Shared R&D competences
    - Broader: Common and Shared competences connect ‘adjacent’ Skill Groups, across Disciplines
    - Deeper: enhance your proficiency levels in one or more (specific) competences

- Your (advanced) Training and Learning will be guided by the experts (SME, PXE, PSE, PSF) in the Skill Groups
    - SGP will be updated (for new graduates)
    - SATP will phase out (no changes for those already enrolled!)
    - Instead, Skill Group Leads can help you connect the experts and navigate your Skill development
- Close collaboration with Line Managers
  - IDP remains a line responsibility - RDTF leaders advise

3. Navigating your Skills and Career

- Overview and accessibility: move quick, stay flexible, be future ready
  - self-explaining competence title with a short description
  - sub-competences to bring depth and breadth
- Using generic proficiency levels for **Awareness, Knowledge, Skill and Mastery**



Chemical S&E	Subsurface S&E	Biological S&E	Electrical S&E	Material S&E	Computer S&E

- Common Competences - techno-economical:
  - Commerciality
  - R&D Project Management
  - Collaborative Innovation
  - Data and Digital

- Shared Competences - technical:

- Tech (n)

Generic Proficiency Levels

Awareness
Able to describe the main elements of a competence area and explain their relevance to R&D

Knowledge
Able to interpret and evaluate information and advice in an area of competence.

Skill
Able to perform a majority of activities without help, some being complex in nature.

Mastery
Able to diagnose and solve significant, complex, non-routine problems in the competence elements.

The R&D Career Ladder

The roles listed below are examples

SG 9-8

Safe and efficient delivery of experimental programs

- Associate Research Technician
- Associate Researcher

SG 7-6

Safe and efficient delivery of experimental programs. Recognized as an expert technical practitioner.

- Senior Associate Researcher
- Laboratory Team Lead
- Senior Experimentalist

SG G-5

Nurture deep scientific and technical expertise

- Researcher
- Engineer
- Project Lead

Lead complex experimental programs

- Principal Experimentalist
- Researcher
- Experimental Team Leader

SG 4-3

Broaden and further develop and deliver scientific and technical expertise

- Senior Researcher
- Senior Engineer
- Scientist
- Systems Analyst
- Systems Architect
- Program leader
- Portfolio Advisor

SG 2-1 / SG LC+

Specialist path Longer tenure, depth expertise

Develop relevant deep scientific programs

- (Sr) Principal Scientist
- (Sr) Principal Researcher
- (Sr) Principal Engineer
- (Sr) Principal Science Expert

Lead Technology and Scientific Identification and Development

- Chief Scientist

Manage end to end Technology maturation

- Delivery Manager
- Team leader
- Technology Manager
- GM

Lead Technology and Science Identification and Development

- GM
- VP
- EVP

Generalist path R&D broadening assignments

R&D

Universal Competence Framework & training
R&D shared competences and technical competences per discipline
SGP and SATP
Leadership attributes and R&D Specialist attributes
